

Jenna DeRosa

Global Distribution Sourcing Manager

jennaderosama@gmail.com | linkedin.com/in/jenna-derosa | jennader.github.io

Summary

Strategic sourcing manager with experience across semiconductor and electronics distribution, covering global sourcing strategy, supplier negotiation, and procurement process design. Track record of delivering cost savings, managing high-spend distributor relationships, and building the data frameworks that support sourcing decisions. Completing a Master of Science in Supply Chain Management with a concentration in Data Analytics.

Experience

Prodrive Technologies | May 2023 – Present

Global Distribution Sourcing Manager | Netherlands

- Own global distribution sourcing strategy for semiconductor and electronic components across all regions. 120M+ USD annual spend, 100+ global partners, 4 regional procurement groups.
- Lead the design of a centralized distribution model consolidating four regional procurement groups into one function, capturing economies of scale and purchasing power.
- Define the operating model behind centralization: sourcing processes, decision rights, and regional stakeholder alignment.
- Manage strategic relationships with global distribution partners and negotiate global terms.
- Adapt sourcing strategy to AI-driven shifts in component availability, allocation, and pricing.
- Assess the effect of trade policy, export controls, and tariffs on sourcing decisions and supplier selection.
- Design sourcing KPIs grounded in how data moves through SAP and supplier systems, so reported performance reflects operations.

Category Manager | Boston, MA

- Managed more than \$5 million in annual distribution spend, covering approximately 80% of US purchasing for production requirements.
- Achieved 8% (approximately \$1M) in bill-of-materials savings within three months of taking over the account, through demand forecasting, cost analysis, and negotiation.
- Served as primary global contact for tariff impact analysis on semiconductors, raw materials, and end products; designed and maintained an HTS code database to evaluate current and projected tariff exposure.
- Built data capture frameworks to support allocation strategy and analysis of cost, price erosion, and supplier performance.
- Optimized \$350K in uncategorized spend and eliminated 20 hours of manual work per week through cross-functional process improvements.
- Led annual business reviews with suppliers, measuring performance against KPIs and negotiating improved terms.

Fusion Worldwide | September 2022 – May 2023

Buyer | Boston, MA

- Managed more than 100 vendor accounts and developed new supplier relationships to meet open-market demand during customer supply disruptions.
- Analyzed supply trends for specific commodity groups through market research with global colleagues, suppliers, and manufacturers.
- Sourced quotes for daily global customer demand and managed purchase orders, lead times, quality testing, and delivery schedules.

Education

Master of Science, Supply Chain Management, concentration in Data Analytics

Boston University Metropolitan College | Expected December 2026

Bachelor of Science, Fashion Business Management, Magna Cum Laude

Fashion Institute of Technology, State University of New York | December 2021

Skills

Systems and analytics: SAP, Microsoft Excel (advanced), Power BI, Python, R, Quarto, data warehousing

Sourcing: strategic sourcing, supplier negotiation, category management, tariff and trade compliance analysis, demand forecasting, process design
